

Wildlife and Fisheries

Welcome! If you like the outdoors and enjoy nature, here is a great opportunity to learn about the wild animals and their interaction with man.

Courses Objectives: To proficiently identify the fundamental practices of the environmental landscape including proper range land practices from a recreational and wildlife stand point.

Assessments: Students will be assessed through classroom and laboratory assignments, tests/ quizzes, research projects, notebooks, and participation. Students will know in advance the point value of each graded task.

Student Expectations: Success in this class depends on your attitude and willingness to learn.

1. Prepared to learn!:

- Writing utensil (pen or pencil).
- Notebook with paper (Notebooks will be graded).
- Textbook or other materials.
- Lab cloths.

2. Classroom Behavior:

Golden Rule!!: Treat others as you wish to be Treated

- Maintain a Positive Attitude.
- Respecting others, their property, their right to learn, and respect yourself.
- Be on time to class (you are tardy if you are not in your seat when the bell rings).
- I will excuse you when the bell rings.
- Being honest at all times (cheating will not be tolerated).
- Be respectful and polite to all guest.
- Treat my Substitutes better than you would treat me.
- Inappropriate actions and poor choices come with consequences.
